## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

Claims 22-25 and 31-36 are allowed.

The prior art does not teach or suggest a method of making a current collector for a fuel cell including all of the claimed features. The most pertinent art includes Fronk et al. (U.S. Patent No. 6,372,376 B1) and Hampden-Smith et al. (U.S. Pub. No. 2002/0107140 A1).

Both the Fronk et al. and Hampden-Smith et al. references do not teach or suggest: A method comprising making a current collector for a fuel cell comprising coating an electrically conductive substrate with a tacky layer of uncured or undried material comprising a corrosion-proof, electrically-conductive filler dispersed throughout an oxidation-resistant and acid-resistant polymer, thereafter embedding a plurality of electrically-conductive particles in a surface of said layer so as to increase the conductivity of said surface over the conductivity of the remainder of said material, and thereafter curing or drying said layer.

For these reasons, the claims are allowed over the prior art. Any comments considered necessary by applicant must be submitted no later than the payment of the

Art Unit: 1795

issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ben Lewis whose telephone number is 571-272-6481. The examiner can normally be reached on 8:30am - 5:30pm.
